

KHUSH JAIN

AWS DevOps Engineer · EKS & Containerization · Solution Architecture · Cloud Automation

Pune, India | +91 8780791994 | khushjain12368@gmail.com | [linkedin.com/in/khush-jain](https://www.linkedin.com/in/khush-jain)

PROFESSIONAL SUMMARY

AWS DevOps Engineer and Solution Architect with 3+ years of hands-on experience delivering cloud-native, containerized, and secure AWS solutions for fintech and global enterprise environments. Deep expertise in EKS microservices (ArgoCD GitOps), Docker, ECS/Fargate, CI/CD pipelines, IaC (CloudFormation), and core AWS services including EC2, Lambda, API Gateway, S3, IAM, RDS, DynamoDB, KMS, Secrets Manager, EventBridge, and VPC networking. Pioneered two AI-powered platforms at Fibe — a GenAI Cloud Automation Portal (AWS Bedrock, ~60% faster provisioning) and an AI Cost Intelligence tool (CUR + Cost Explorer + CloudWatch + Bedrock) that flagged 100s of GBs in anomalous CloudWatch log ingestion and drove direct cost reduction. Proven in multi-region DR, security hardening, cost optimisation (\$260K+ saved), and engineering leadership. ISO/IEC 27001:2022 ISMS trained.

TECHNICAL SKILLS

AWS Core	EC2, S3, IAM, Lambda, API Gateway, EventBridge, AWS Batch, CloudFormation, CloudWatch, RDS, DynamoDB, KMS, Secrets Manager, VPC, EKS, ECS, Fargate, Route 53, CloudFront, WAF, Bedrock
Containerization	Docker, EKS, ECS, Fargate — microservice deployments, task/service management, serverless containers, ArgoCD GitOps
IaC & Automation	CloudFormation, Terraform, Python (automation & data engineering scripts), Bash, AWS Lambda
CI/CD & DevOps	CodePipeline, CodeDeploy, GitHub Actions, ArgoCD (GitOps), TeamCity, Blue-Green Deployments
Networking	VPC design, subnets, NAT gateways, routing tables, security groups, multi-region connectivity
Observability	CloudWatch, Splunk, ServiceNow, SRE practices, RTO/RPO optimisation, incident & change management
Security	AWS WAF, DDoS mitigation, IAM hardening, KMS encryption, Secrets Manager rotation, ISO/IEC 27001:2022 ISMS
GenAI & AI Ops	AWS Bedrock, LLMs, Prompt Engineering, AI-powered cost anomaly detection, natural language infra provisioning

PROFESSIONAL EXPERIENCE

Assistant Manager – Cloud Engineering · Fibe (Fintech)

Dec 2025 – Present | Pune

- ▶ Lead cloud platform delivery for a fintech lending application — ensuring high availability, performance, and security across production AWS environments; act as primary technical escalation point for complex AWS issues across EC2, Lambda, EKS, S3, IAM, and CloudFront.
- ▶ **AI Cost Intelligence Platform:** Built an AI-powered cost anomaly detection tool using AWS Bedrock, CUR, Cost Explorer API, and CloudWatch metrics for real-time spend analysis and LLM-powered insights — flagged anomalous CloudWatch log ingestion running into 100s of GBs from misconfigured log groups, enabling targeted cleanup and direct cost reduction.
- ▶ **GenAI Cloud Automation Portal:** Pioneered an LLM + AWS Bedrock portal for natural language infrastructure provisioning with guardrails, approval workflows, and audit logging — reducing provisioning time by ~60%.
- ▶ Manage serverless deployments and automated rollouts integrating API Gateway, Lambda, EventBridge, and AWS Batch — enabling event-driven and async workload orchestration across environments.
- ▶ Architect and manage containerized workloads using Docker, ECS, and Fargate — handling task/service management, Dockerfile authoring, and serverless container deployments for microservice applications.
- ▶ Design and manage AWS networking topologies — VPCs, subnets, NAT gateways, routing tables, and security groups for secure and scalable multi-environment connectivity.
- ▶ Manage data layer infrastructure including RDS and DynamoDB; implement KMS encryption and Secrets Manager rotation policies aligned to security and compliance requirements.
- ▶ Deploy and manage AWS WAF on CloudFront for DDoS/bot mitigation and deep traffic analytics; achieve ~\$4,000/month S3 cost savings via lifecycle policy automation.

- ▶ Drive CI/CD pipeline automation using CloudFormation and Lambda (Python); manage secrets rotation, password automation, and deployment governance to strengthen security posture.
- ▶ Lead a team of 4 cloud engineers; collaborate with DevOps, security, and development stakeholders on architecture reviews, cost governance, and platform best practices.

Cloud Administrator · ZS Associates (Global Consulting)
Jan 2023 – Dec 2025 | Pune

- ▶ Administered AWS cloud platforms for global enterprise applications across China and HiSec environments — ensuring availability, security, and operational excellence across production workloads.
- ▶ Designed and implemented DR setup for an EKS-based application deployed via ArgoCD — including multi-region failover strategy, GitOps-based recovery procedures, and restoration validation across environments.
- ▶ Re-architected a flagship enterprise application: reduced RTO from 18 hours to 6 hours, delivering ~\$260,000 annual cost savings through architecture modernisation and resilience improvements.
- ▶ Designed and managed AWS networking topologies — VPCs, subnets, NAT gateways, routing tables, and security groups across multi-region environments.
- ▶ Designed multi-region DR and air-gapped recovery architectures with automated failover testing and documented resilience runbooks for stakeholder communication.
- ▶ Built Blue-Green deployment pipelines using CodePipeline, CodeDeploy, and EC2 — enabling zero-downtime releases and reliable rollbacks aligned with SRE best practices.
- ▶ Managed RDS, DynamoDB, and KMS encryption; implemented Secrets Manager rotation policies aligned to ISO/IEC 27001:2022 audit requirements.
- ▶ Developed Python automation scripts to eliminate repetitive operational tasks; reduced manual errors across incident and change management workflows.
- ▶ Removed ~2 PB unused S3 data and standardised lifecycle/backup policies for ISO/IEC 27001:2022 compliance.

KEY PROJECT HIGHLIGHTS

AI Cost Intelligence [Fibe]	AWS Bedrock + CUR + Cost Explorer + CloudWatch — real-time cost anomaly detection and LLM-powered spend insights; flagged 100s of GBs of misconfigured CloudWatch log ingestion, driving targeted cost cleanup.
GenAI Cloud Portal [Fibe]	LLM + AWS Bedrock portal for natural language infra provisioning; guardrails, approval workflows, audit logging. ~60% faster provisioning and reduced manual toil.
EKS DR & GitOps [ZS]	Designed DR setup for EKS-based application deployed via ArgoCD — multi-region failover strategy, GitOps-based recovery, and restoration validation across environments.
Serverless Orchestration [Fibe]	API Gateway + Lambda + EventBridge + AWS Batch integration for event-driven and async workload orchestration; Docker/ECS/Fargate for containerized microservice deployments.
Flagship App Redesign [ZS]	Re-architected enterprise app: RTO 18 → 6 hrs, ~\$260K/year saved. Air-gapped DR, multi-region failover, automated resilience runbooks.
Security & Cost Optimisation [Fibe]	WAF on CloudFront for DDoS/bot mitigation; KMS + Secrets Manager rotation; \$4K/month S3 savings via lifecycle automation. ISO 27001 aligned.

EDUCATION & CERTIFICATIONS

B.Tech – Computer Science & Engineering · MIT School of Engineering, Pune · 2019–2023
ISO/IEC 27001:2022 ISMS Lead Auditor Trained · BSI Training
AWS Cloud Practitioner · [In Progress](#)
Embedded Systems & Robotics · IIT Bombay (Online)

Open to Senior DevOps · AWS Solution Architecture · Platform Engineering · Cloud-Native roles
